Stonegate Medical Clinic is a trading name of York Private Medical Ltd. Registered Head Office: 23 Stonegate, York, YO1 8AW. Company reg No. 9745036

## History of Stonegate Medical

**Stonegate Medical Clinic was founded by David Grabowski in 2016 with the vision of creating Patient Choice and the ability to receive truly patient centred care at times to suit them within a pleasant and relaxing environment.**

The idea was to provide traditional medicine giving the clinician and the patient time to comfortably carry out a consultation.

Not only do we provide private GP services, but we also integrate relevant and appropriate services within the clinic to improve access to services, especially those that may be

sensitive such as mental health, or difficult to access.

Since its launch, the clinic has grown from offering routine private GP services, health screening and vaccinations to include, minor surgery, earwax removal, work and visa medicals, mental health services, specialist paediatric services and occupational health. New services are being added to continually improve our service.

The key to success and growth for the company is solely based on the team, from the back of house team to our clinical team who all share the same beliefs and visions of truly patient centred care.

### Clinic insight

At Stonegate, we strive to provide a high level service that compliments the NHS, minimising and intentionally avoiding any strains on our NHS counterparts. As a private healthcare provider, our patients have the option to decide whether they would like to carry out their treatment privately or through the NHS. Around 99.9% of our patients choose to follow their care privately as per our recommendations, unless in certain situations where NHS care may be the best option. All patients are actively encouraged to share their consultation notes with their NHS GP. This is an internal service which we offer, at no additional charge to the patient.

All pathology is carried out privately as is any diagnostics with any of the private providers locally and regionally.

Contrary to common beliefs, our patient demographic is vast, and we treat patients of all ages and from all social demographic backgrounds. This is something we feel passionate about as we want our services to be easily accessible for all.

As stated, we offer a variety of services and as a clinic, regularly review the services being provided and look to evaluate, improve, and even introduce new services supporting our clinical team from conception to delivery. As a result, we have worked with our team to develop and launch services that they may not have been able to do prior to their time at Stonegate.

## Working as a Private GP at Stonegate Medical

At Stonegate we provide flexible sessions to fit in with your existing commitments be it family or work.

Our clinic is open five days a week and our team work sessions to suit them, be it half day clinics, 9 to 5 style clinics or full days.

You will see an interesting mix of patients presenting with common ailments to complex concerns. Patients typically self-select from the doctor biographies on our website, which results in the team of doctors treating patients matching their interests as well as their routine work.

We offer comfortable surroundings and an administration team who are hands on to work with you and support you at every step.

Our private GP appointments are a minimum of 20 minutes with extended consultations options available depending on the needs of the patient.

As a clinic, we hold regular meetings and actively encourage discussions between the team outside of these for anything specific or requiring team input.

If you have a particular interest(s), we are keen to hear from you and work together to integrate this in to the services.

As a team doctor, you would be contracted on a self employed basis, working on a remuneration package that would be a fee share between you and the clinic. The earning potential is high with support in place to help assist new starters into the clinic. We also in some instances offer a fixed day rate as an alternative to the fee share model providing doctors peace of mind of fixed income streams.

One of the main factors to address is your indemnity, as depending on your existing policy, you may or may not be already covered for private work. This is something that is worth considering as well as looking at comparisons from other providers, however, the clinic operates a group discount scheme with MPS which would benefit with a 10% reduction on subs. This is something that we would be able to assist you with.

The business is going through a period of growth, and we see this as an exciting time to join the clinic and be a part of a service that offers great value to patients and surrounding services.

### What are we looking for?

We are seeking like-minded clinicians who share our beliefs and want to work in an environment that allows the flexibility and scope to provide great care to our patients.

We are looking for long term clinicians to join our team.

As a clinic we have seen strong growth year on year and are looking for clinicians who can join the clinic to help grow and develop further.

If you would like further information, you can contact us via email: [recruitment@stonegatemedical.co.uk](mailto:recruitment@stonegatemedical.co.uk) and all enquiries are kept strictly confidential
